SUPPLEMENTARY INFORMATION: The Administrative Conference of the United States makes recommendations to federal agencies, the President, Congress, and the Judicial Conference of the United States regarding the improvement of administrative procedures (5 U.S.C. 594). The membership of the Conference, when meeting in plenary session, constitutes the Assembly of the Conference (5 U.S.C. 595).

Agenda: In addition to receiving updates on past, current, and pending Conference initiatives, the Assembly will consider four proposed recommendations as described below:

Paperwork Reduction Act Efficiencies. This proposed recommendation encourages collaboration between the Office of Information and Regulatory Affairs and federal agencies to maximize opportunities for making the information collection clearance process under the Paperwork Reduction Act more efficient, while still maintaining its integrity. The proposed recommendation encourages using generic clearances and common forms more frequently, providing more training to agencies, and improving several other aspects of the information collection clearance process.

Administrative Judges. This proposed recommendation addresses agency practices related to the use of administrative judges—adjudicators who preside over evidentiary hearings that are not governed by the adjudication provisions of the Administrative Procedure Act. It offers recommendations for agencies to consider when designing or evaluating adjudication programs that promote impartiality in administrative judges and increase clarity and transparency with respect to the policies and procedures that govern their selection, oversight, evaluation, discipline, and removal.

Minimizing the Cost of Judicial Review. This proposed recommendation encourages federal agencies that anticipate litigation over their rules to consider early in the rulemaking process whether a rule is severable, meaning divisible into portions that can and should function independently, and outlines steps agencies should take if they intend that portions of a rule should continue in effect even though other portions have been held unlawful on judicial review. It also encourages courts adjudicating a challenge to an agency rule to solicit the parties' views on the issue of severability in appropriate circumstances.

Electronic Case Management in Federal Administrative Adjudication. This proposed recommendation offers guidance for agencies considering whether and how to implement an electronic case management system. It provides factors for agencies to consider in weighing the costs and benefits of an electronic case management system; sets forth measures an agency should take to ensure privacy, transparency, and security; and describes ways an electronic case management system may improve adjudicatory processes.
